EDUCATION

University of Virginia

B.S. Computer Science

Aug. 2024 – May 2028

Charlottesville, VA

- **GPA:** 3.4/4.0
- **Relevant coursework:** Computer Systems and Organization 1, Software Development Essentials, Discrete Math and Theory 2, Engineering Ethics

RELEVANT EXPERIENCE

Olive Oil Flights

CS/Web Developer Intern

Jan. 2026 – May 2026

Charlottesville, VA

- Supported web development for a **CBIC 2026 Best New Company** award winner
- Implement front-end updates with CSS to enhance site functionality, layout, and visual design
- Develop and integrate wholesale purchasing features to support business growth
- Work cross-functionally with marketing interns to align technical updates with branding and content goals

MR5 Navigation System

Team Member

Jan. 2025 – May 2025

University of Virginia, Charlottesville, VA

- Developed an interactive indoor navigation system with a web-based map and QR code access for the Medical Research Building 5, improving wayfinding and supporting ADA accessibility
- Conducted user testing with 10 participants: reduced navigation times, increased user comfort, and enhanced spatial awareness
- **Finalist** (top 7 of 157 projects), **2025 First-Year Engineering Expo** for teamwork, solution design, and communication

FIRST Robotics Competition Team

Programming Captain

Oct. 2023 – May 2024

Norfolk, VA

- Led a team of 5 programmers in developing robot software in Java, implementing tank steering and autonomous routines while collaborating with mechanical and electrical sub teams
- Coded and integrated controls for Crescendo (2024) robot, featuring dual-purpose intake/shooter
- Earned **Creativity** and **Sustainability Awards**, and aided competition performance with real-time debugging

PERSONAL PROJECTS

Oasis – AI Recipe Generator (Hackathon Project)

React, Express.js, Gemini API, JavaScript, Tailwind CSS

Mar. 2026

- Developed a full-stack AI application that converts food scraps into usable recipes, addressing everyday food waste among college students
- Integrated Gemini API for image recognition and natural language generation, enabling real-time ingredient extraction from user-uploaded images
- Built a responsive frontend with React and Tailwind, optimizing usability across desktop and mobile devices

SKILLS & INTERESTS

- **Technical Skills:** Java, Python, C, JavaScript, HTML/CSS, React, Git/GitHub, Arduino
- **Languages:** English (Native), Italian (Intermediate High) Tagalog/Filipino (Limited Working Proficiency)
- **Interests:** Quantum computing, Robotics, Cooking, Video Editing, Tennis/Pickleball
